

## Product Declaration of Conformity to REACH and RoHS

REACH Regulation 1907/2006/EC

RoHS Directive 2011/65/EU and RoHS 215/863/EU

One of the essential goals of RTS electronic GmbH is an environmentally compatible product design. Therefore, we actively pursue the requirements of the European Chemical Regulation REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) and the European RoHS (Restriction of certain Hazardous Substances) policy for fulfilling resulting tasks and obligations to the best of our knowledge and belief.

With utmost care and in close cooperation with our suppliers and manufacturers the research, compilation and constant updating of the listed information is carried out.

As an industrial service provider for electronic components, we cannot confirm conformity to RoHS on side of the product manufacturers, we can only forward the available information if they were provided.

Please note that RTS electronic GmbH does not assume any warranty for the correctness, up-to-dateness and completeness of the transmitted information as well as legal claims regarding the usage of this information.

### RoHS Policy 2011/65/EU and RoHS 215/863/EU

The maximum concentration of certain chemical substances in finished electrical and electronic equipment, as well as in spare parts and assembled cables, is regulated by the European RoHS Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment. This directive also includes the two essential RoHS directives 2015/863/EU and 2017/2102. The following substances and maximum permissible concentrations in homogeneous materials are permitted here:

|   |                                       |          |
|---|---------------------------------------|----------|
| - | Lead (Pb)                             | < 0,1 %  |
| - | Mercury (Hg)                          | < 0,1 %  |
| - | Chromium (Cr(VI))                     | < 0,1 %  |
| - | Cadmium (Cd)                          | < 0,01 % |
| - | Polybromierten Biphenyl (PBB)         | < 0,1 %  |
| - | Polybrominated Diphenyl Ethers (PBDE) | < 0,1 %  |
| - | Bis(2-Ethylhexyl)phthalat (DEHP)      | < 0,1 %  |
| - | Benzylbutyl Phthalate (BBP)           | < 0,1 %  |
| - | Dibutyl Phthalate (DBP)               | < 0,1 %  |
| - | Diisobutyl Phthalate (DIBP)           | < 0,1 %  |

The RoHS status is specified on our order confirmations, delivery notes and invoices as follows:

**RoHS 2011/65/EU**

The manufacturer/supplier of this product confirms the following:

None of the regulated substances are contained above the maximum allowable concentration or regulated substances are contained above the maximum allowable concentrations but exempted uses for these substances are applicable according to annex III and annex IV.

**No RoHS**

It is confirmed by the manufacturer/supplier of the product that regulated substances are contained above the maximum permissible concentrations and that no exemptions are claimed.

**RoHS not relevant**

The manufacturer/supplier confirms that these product does not fall within the scope of application of RoHS policy article 2.

**REACH-Regulation 1907/2006/EG**

According to the REACH regulation, RTS electronic GmbH is a so-called "downstream user".

Regarding this background, we expect our upstream suppliers/manufacturers to fulfil their obligations according to article 33 and to carry out all substance registrations or notifications. In reference to the continuous expansion of the ECHA candidate list in accordance with article 59(10), this requires a continuous evaluation and corresponding implementation of measures. If we receive information regarding this topic it will be communicated.

RTS electronic GmbH
